WAY TO REINVENT YOURSELF

Coaxial Cable

A type of copper cable specially built with a metal shield and other components engineered to block signal interference

- ✓ Inexpensive
- ✓ Easy to install
- ✓ Easy to expand
- ✓ Resistance to EMI
- ✓ Up to 10 Mbps
- ✓ Durable

CLARUSWAY©
WAY TO REINVENT YOURSELF

Coaxial Cable

There are two types of coaxial cable:

Thicknet (10Base5)

Thinnet (10Base2)

Thicknet and thinnet are used in Ethernet implementations

Twisted-Pair Cable

The most common type of network medium used in LAN today

UTP - Unshielded Twisted pair

STP - Shielded Twisted pair

Cheaper

Easy to work

High transmission

► Twisted-Pair Cable

N <Signaling> X

N: Signaling rate in Mbps

<Signaling>: Signalling type (*baseband or broadband*)

X: Unique identifier

Examples:

10Base-T: 10Mb or 10Megabits twisted pair

100Base-F: 100Mb or 100Megabits fiber

► Twisted-Pair Cable

UTP Categories - Copper Cable

UTP Category	Data Rate	Max. Length	Cable Type	Application
CAT1	Up to 1Mbps	-	Twisted Pair	Old Telephone Cable
CAT2	Up to 4Mbps	-	Twisted Pair	Token Ring Networks
CAT3	Up to 10Mbps	100m	Twisted Pair	Token Ring & 10BASE-T Ethernet
CAT4	Up to 16Mbps	100m	Twisted Pair	Token Ring Networks
CAT5	Up to 100Mbps	100m	Twisted Pair	Ethernet, FastEthernet, Token Ring
CAT5e	Up to 1 Gbps	100m	Twisted Pair	Ethernet, FastEthernet, Gigabit Ethernet
CAT6	Up to 10Gbps	100m	Twisted Pair	GigabitEthernet, 10G Ethernet (55 meters)
CAT6a	Up to 10Gbps	100m	Twisted Pair	GigabitEthernet, 10G Ethernet (55 meters)
CAT7	Up to 10Gbps	100m	Twisted Pair	GigabitEthernet, 10G Ethernet (100 meters)

Fiber-Optic Cable

Very thin strand of pure glass that acts as a waveguide for light over long distances

Total internal reflection

Fiber-Optic Cable

- | | |
|------------------------------------|--|
| ✓ Immune to EMI and RFI* | ✗ Difficult to install |
| ✓ Very long range | ✗ More expensive than TP |
| ✓ Broad bandwidth (Tbits/s or THz) | ✗ Troubleshooting equipment is more expensive than TP test equipment |
| ✓ Low transmission loss | ✗ Harder to troubleshoot |
| ✓ Not dissipate heat | |

Fiber-Optic Cable

Media Converters

Converts Ethernet or other communication protocols from one cable type to another type

Main types:

- Fiber-to-Ethernet
- Fiber-to-Coaxial
- Fiber-to-Fiber
- Ethernet-to-Coaxial

Fiber-to-Ethernet converter

Cable Properties

Cable Properties

Transmission Speeds

Based on the type of cable or fiber, network administrators can control the speed of a network to meet the network's traffic demands

Media Type	Bandwidth	Performance: Typical Error Rate
Twisted-pair for analog voice applications	1 MHz	Poor to fair (10^{-5})
Coaxial cable	1 GHz	Good (10^{-7} to 10^{-9})
Microwave	100 GHz	Good (10^{-9})
Satellite	100 GHz	Good (10^{-9})
Fiber	75 THz	Great (10^{-11} to 10^{-13})

Cable Properties

Distance

Standard	Data Rate	Max Distance	Cable Type
10Base2	10 Mbps	185 m	Coaxial
10Base5	10 Mbps	500 m	Coaxial
10BaseT	10 Mbps	100 m	Ethernet
100BaseT	100 Mbps	100 m	Ethernet
1000BaseT	1 Gbps	100 m	Ethernet
10BaseFL	10 Mbps	2 km	Fiber (Multi Mode)
100BaseSX	100 Mbps	300 m	Fiber (Multi Mode)
100BaseLX	100 Mbps	100 km	Fiber (Single Mode)
1000BaseLH	1 Gbps	70 km	Fiber (Single Mode)

Cable Properties

Simplex

Half-duplex

Full-duplex
